

University of Brighton

School of Environment and Technology hosts for the

National Science and Engineering Week

'Our World in Motion'

Tuesday 13 March 2012. 9.30-17.00

The 'Our World in Motion' event on Tuesday, 13 March 2012 has been designed to dovetail the theme of National Science and Engineering Week 2012 with disciplines associated with the Faculty of Science and Engineering and the Chelsea School of Sport at the University of Brighton. Five speakers (three external and two in-house) will deliver keynote lectures on a broad spectrum of subjects including global epidemics (Pharmacy), electromobility (Engineering), mobility in sport (Sport Science), faunal and floral migration (Ecology) and cryospheric change (Geology) to a mixed audience of academics, university and sixth form students, U3A members and the general public, all of whom will be invited to participate in wide-ranging discussions of the issues. The venue is the Cockcroft hall on the Moulsecoomb Site of the university. This is the fourth meeting arranged by these organisers, the second related specifically to the National Science and Engineering Week theme.
